

I am victim of thought / mindreading. I have been long time victim of it and I have contacted so many times for also FBI, local departments and Washington leaders to get it cut and compensated. Last time, when I called to Las Vegas FBI office, phone was closed to my ears. Whoever keeps this thought reading on, they doing a crime and I want it stopped and end distribution of my private life details. I am Finnish born U.S. citizen. Listening my brain activity has happened already before 1994, when I came to work here, having green card and Finnish born husband. I have sent charges for Finland, but they do not respond. I have contacted to President Obama in order to handling issue with them, but he does not handling it, not with me not with them. If I keep alone pressuring them to pay for damages, I think it creates unbalance for relationships and that is why I keep contacting including for FBI (this is about 10th time in few last years) - this issue needs to be handled with me also. I am victim, I have never been in jail or charged for anything, I have not been juvenile either - this listening has been on for reason, what I cannot know.

Please, consider to support disconnecting this type of abuse, so I could continue my life, work and my family life. If this contact do not lead again for nothing, I keep contacting Finnish and Washington leaders. I know, there is better way to handle problems and FBI as a federal agency should be more interested about to solving this crime without I have to feed about it years and years, as I have done.

This time I am Las Vegas resident and I am locally available provide any additional details, what you may be interested to know. Please contact and end this crime this time.
